Liftgate History

Truck Master Philosophy

General Design Features

TL Series

Liftgate History

Truck Master liftgate production began at the Holland Equipment facility in 1981 with one 2200 lbs. model. Currently there are over 40 models ranging from traditional fold-away models to conventional railgates and including the advanced direct hydraulic lift. Truck Master offers lift capacities from 2500 lbs. to 6600 lbs. And platform sizes from 36" to 84" with the widest (88") platform in the industry.

Holland Truck Master Philosophy

Holland's commitment is to produce and provide a reliable, dependable and quality liftgate. We achieve this through the design of a user friendly product with low maintenance requirements, that is easy to service and provides the "lowest cost per mile" and the "highest up-time".

Holland is reliable, dependable and qualified personnel to promote and support the product line. From Sales to Service, Design to Assembly, Holland has personnel familiar with current manufacturing methods and the latest design software. People that are up-to-date with today's demanding applications and changing market, along with many who are able to provide unsurpassed product knowledge and customer service. Holland, people and products who...
