# PowerTech ™ EWX 4045TFG03 Diesel Engine

**Generator Drive Engine Specifications** 

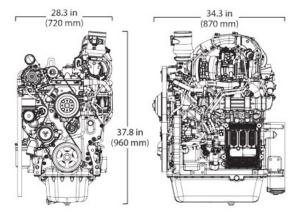

4045TFG03 shown

### Certifications

CARB

EPA Tier 4

# **Engine dimensions**

Dimensions may vary according to options selected. Call your distributor for more information.

General data	
Model	4045TFG03
Number of cylinders	4
Displacement - L (cu in)	4.5 (275)
Bore and Stroke mm (in)	106 x 127 (4.17 x 5.00)
Compression Ratio	19.0 : 1
Engine Type	In-line, 4-cycle
Aspiration	Turbocharged

Length - mm (in) to rear of block	870 (34.3)
Width - mm (in)	720 (28.3)
Height mm (in)	960 (37.8)
Weight, dry kg (lb)	510 (1124)

Performance data range												
5 / 1	Engine power		Rated fan power		an power		Calculated generator set output					
Rated speed	Pr	ime	Star	ndby	Generator efficiency			Power factor	Prime		Standby	
Hz(rpm)	kW	hp	kW	hp	%	kW	hp		kWe*	kVA	kWe	kVA
60(1800)	50	68	55	74	88-92	2.2	3.0	0.8	42-44	53-55	46-49	58-61

Prime power is the nominal power an engine is capable of delivering with a variable load for an unlimited number of hours per year. This rating conforms to ISO3046 and SAE J1995.

Standby power is the maximum engine power available at varying load factors for up to 200 hours per year when applied to conform with ISO 8528-1. This rating conforms to ISO 3046 and SAE J1995. Calculated generator set rating range for standby applications is based on minimum engine power (nominal -5 percent) to provide 100 percent meet-or-exceed performance for assembled standby generator sets.

\*Electrical power is calculated from the typical generator efficiency and fan power percentages shown. Applications may vary.

Exhaust filter dimensions	
Size	2
Diameter - mm (in)	260.71 (10.3)
Length - mm (in)	572.59 (22.5)
Weight - kg (lb)	19.96 (44.0)

See your John Deere Power Systems engine distributor for more information on available filter size options.

### Features and benefits

### Wastegated Turbocharger

 Wastegated turbochargers are designed to develop more airflow at lower engine speeds to improve low-speed torque. The wasteg ate control device bleeds off a portion of the exhaust flow at higher engine speeds. Wastegated turbos deliver improved transient response and higher peak torque without compromising engine envelope size. They also provide the lowest installed cost across a given power range.

#### **Exhaust Filters**

This system is the Best Available Control Technology (BACT) for particulates that delivers premium block load acceptance characteristics and utilize a catalyzed exhaust filter that contains a diesel oxidation catalyst (DOC) and a diesel particulate filter (DPF). The DOC reacts with exhaust gases to reduce carbon monoxide, hydrocarbons, and some particulate matter (PM). The downstream DPF traps and holds the remaining PM. Trapped particles are oxidized within the DPF through a continuous cleaning process called passive regeneration. Passive regeneration occurs during normal operating conditions when heat from the exhaust stream and catalysts within the exhaust filter trigger the oxidation of the trapped PM. If passive regeneration cannot be achieved due to low temperature, load, or speed, then PM is removed using active regeneration — an automatic cleaning process controlled by the exhaust temperature management system.

# High-Pressure Common-Rail (HPCR) and Engine Control Unit (ECU)

 The HPCR fuel system provides variable common-rail pressure and higher injection pressures up to 2,500 bar (36,000 psi). It also controls fuel injection timing and provides precise control for the start, duration, and end of injection.

# Compact Size

- Lower installed cost
- Mounting points are the same as previous engine models

## 2-Valve Cylinder Head

Cross-flow head design provides excellent breathing from a lower-cost 2-valve cylinder head.

### John Deere Electronic Engine Controls

- Faster engine control unit (ECU) manages both the engine and the exhaust filter
- JDLink <sup>™</sup> lets you monitor, protect, and maintain your equipment 24/7
- Premium software option integrates with equipment or vehicles to reduce engineering and installation costs
- Electronic engine controls can be engine or remote mounted

### Additional Features

- Gear-driven auxillary drives
- 500-hour oil change
- Self-adjusting poly-vee fan drive
- RH and LH engine mounted final fuel filters
- Replaceable (wet) cylinder liners
- Optional low-pressure fuel system with electrical transfer pump and "autoprime" feature
- Single fluid solution
