

The Builrite Model 1380-TM is upgraded version of the Model 1300-TM, which incorporates an on-demand hydraulic system, using a high pressure, piston pump, as opposed to the 1300-TM's triple gear pump system. As a result, the operator controls are smoother, quicker reacting and easier to operate, reducing operator fatigue. This loader is designed for highway contractors, foundation drilling contractors, pipeline contractors and any other applications requiring higher lift capacities. **Key features include:**

Increased Lift Capacity

The 1380-TM offers superior lifting capability as compared to anything on the market today. Using state of the art, high strength steels, the loader weight to lift capacity has shown significant improvement, as compared to previous designs. Please see lift capacity charts on page 3.

Main Boom and Jib Boom Design

- 1) Fabricated Main Boom and Jib boom, made from high tensile steel.
- 2) Boom Length - 23'4" with 3' squirt extended.
- 3) Aluminum bronze bushings on all pivot points. 2.5" Cylinder pins for excellent surface area to force ratio.

Hydraulic System

- 1] Pilot operated, pressure compensated load sense controls using a single, variable piston pump operating at 4,500 PSI. This operating system is 20% faster and more energy efficient than traditional gear pump systems. Requires 1450-1550 RPM @ Pump for maximum performance and efficiency.
- 2] Ergonomic joystick controls to alleviate fatigue.
- 3] Highly efficient, pressure compensated sections in main control valve.
- 4] 60 gallon hydraulic tank mounted to loader with easily serviceable, high capacity, in tank return filter.
- 5] High capacity, 12 Volt oil cooler with bypass.
- 6] Hydraulic / Electric collector features 10 hydraulic passes and 8 electrical passes for operating a variety of attachments, magnets, additional lighting, etc.

Rotation System

- 1] Continuous rotation using heavy duty, 39" (990 mm) rotation bearing (30 bolts top/bottom) and hydraulic motor/gearbox capable of providing 6 RPM and 34,590 Ft. Lbs. of torque.
- 2] Foot pedal controlled.

Tower

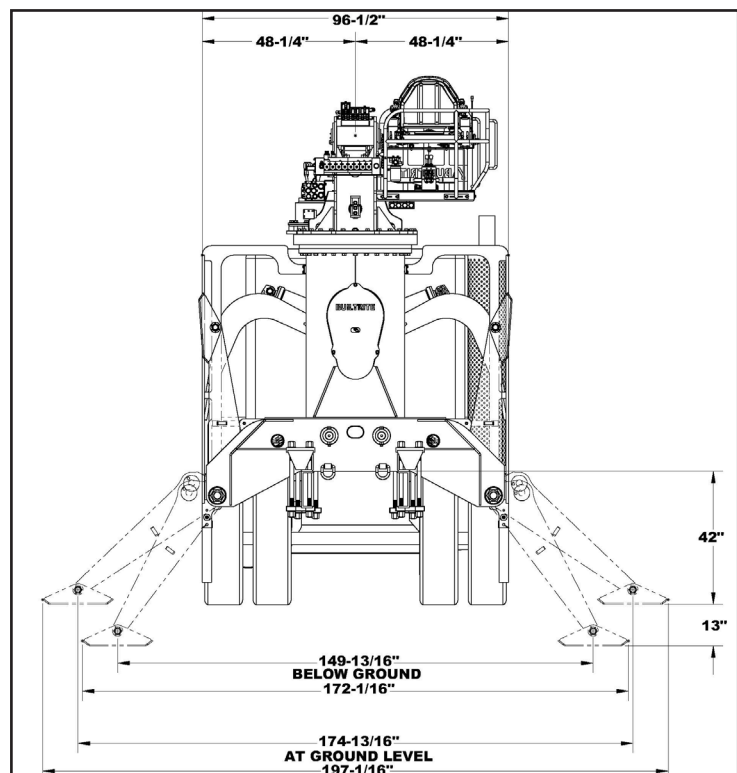

- 1] Fabricated structure with enhanced access to hydraulic and electrical collector, with easily removable metal covers.
- 2] 18" wide ladder, featuring 2" deep rungs with grip strut treading for maximum traction/anti slip. Solid round, 3/4" diameter steel rod, hand grips.
- 3] The tower requires 42" of truck frame.

Platform

- 1] Platform rotates with operator for maximum visibility.
- 2] Ergonomic seat and joystick controls for maximum comfort.
- 3] Safety guard rail around operator and heavy duty, front shield.
- 4] Comfortable, fold down operator's seat with seat belt.

Stabilizers

- 1] Independently operated, fold away type stabilizer legs allow loader to be operated on uneven surfaces.
- 2] Controls located on operator's platform.
- 3] Stabilizer leg pins and cylinder pins are easily accessible for ease of service.
- 4] Dimensions - See diagram to the right:

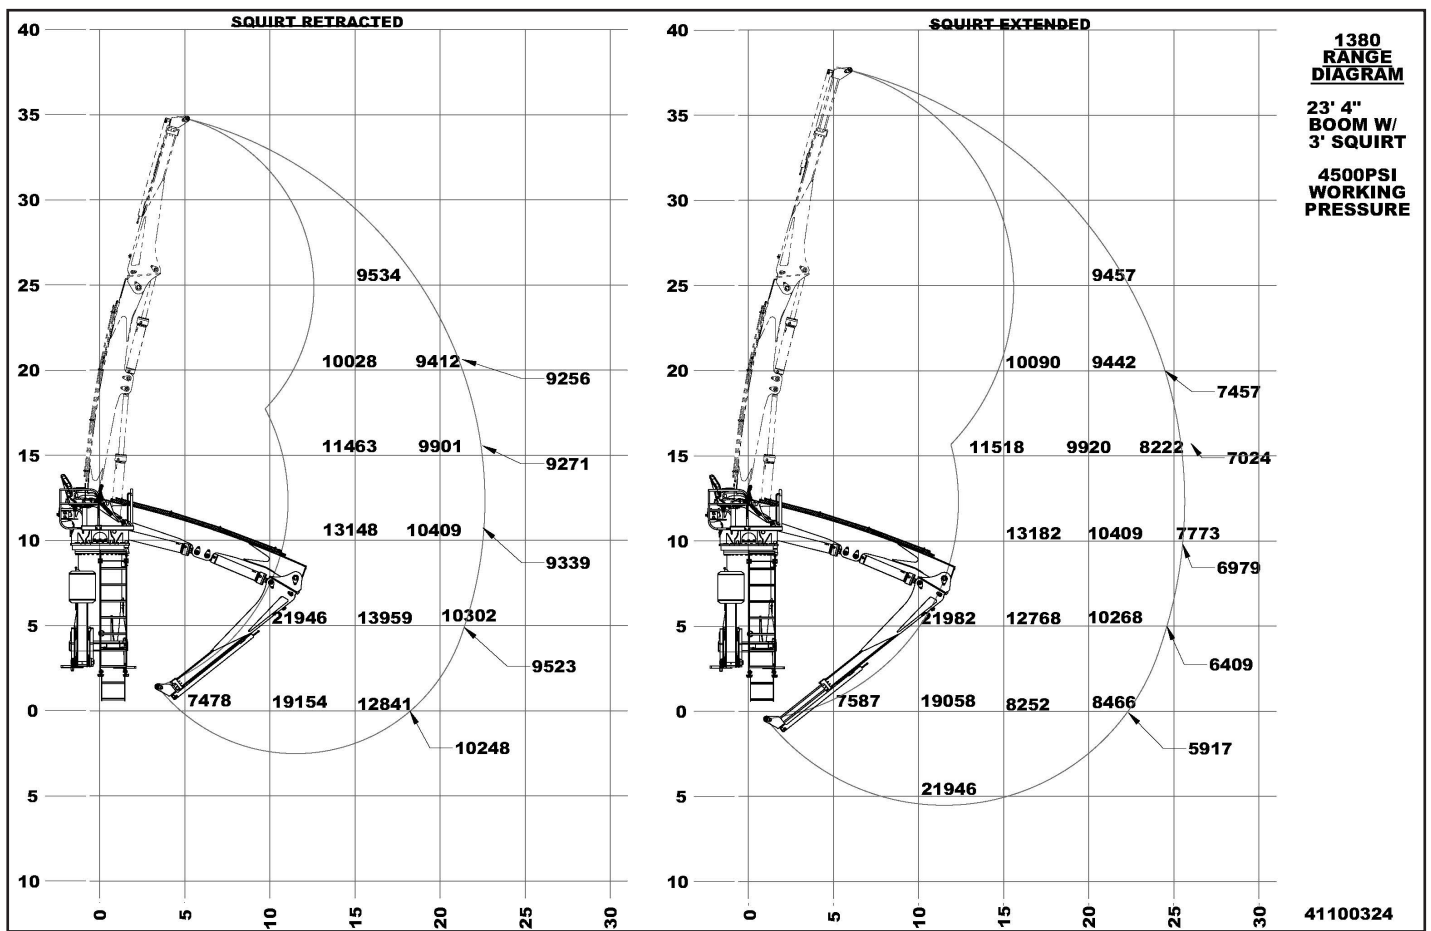

Cylinders

- 1) Designed for high pressure.
- 2) Induction hardened rods on main and jib cylinders for better protection against impact.
- 3) Robotic welded barrels / Inertia welded rod/rod eyes.
- 4) Built in hydraulic slow downs.
- 5) 2.5" Cylinder pins and bearings for longer life.

Miscellaneous

- 1) The weight of the loader, minus the attachment is 8,450 Lbs. (3,833 Kg.)
- 2) Bultrite offers a wide variety of attachments to suit numerous applications.
- 3) Mounting bolts, Cooler and Hydraulic Tank are included in the price of the loader.
- 4) Lubrication - a centralized, lubrication manifold block is provided and can be greased while the operator is sitting down in his seat. This system greases all pivot points except the jib tip and attachment.
- 5) Standard colors are Bultrite yellow, white or black. Custom colors available upon request.

Lift Capacity Chart With 23' 4" Boom

Note: The lift capacities shown above do not reflect the weight of a grapple, connecting link or any other attachment. Attachment weights must be deducted from the above figures to gauge the lift capacity with these attachments.
